

SWAT element parameterizer error, AvgSlope

Posted by avogl - 2009/10/14 23:01

I installed the latest release of AGWA2 (20091008) and downloaded the updated package files. I'm having trouble with the element parameterizer for SWAT. The log file shows:

```
ParameterizerElements.UpdateWatershedSlope()
```

```
Error HRESULT E_FAIL has been returned from a call to a COM component.
```

```
Error Code: a
```

All plane elements come out with in the AvgSlope field. I've tried it with several discretizations, including some that were created before the update was installed.

Any ideas?

Thanks,

Adrian

Hi Adrian,

A bug was introduced in the 20091008 release where the watershed slopes for SWAT were not being calculated. That bug was fixed in a release posted today.
